Just when demographers are ringing alarm bell about overpopulation, Amazon founder Jeff Bezos says we need to populate our solar system. Mister Bezos was asked for his thoughts on humanity living in outer space in a thousand years time. He replied: "I would love to see,

you know, a trillion humans living in the Solar System. If we had a trillion humans, we would have at any given time 1000 Mozarts and 1000 Einsteins... Space would be full of life and intelligence and energy." He added that he wants to help ~~build~~ build heavy infrastructure that will be used by the space entrepreneurs of the future generations... so that inspiration and imagination can really be uplifted.

Mikhail Bezos' thoughts are echoed by fellow multi-billionaire Elon Musk, owner of X (formerly known as Twitter). In 2021, he said of the human race, "we don't want to be one of those single-planet species, we want to be a multi-planet species." Earlier this year, Mikhail Musk ~~was~~ worried that: "Population collapse due to low birth rates is a much bigger risk to civilization than global warming... mark these words" Mikhail Bezos concerns of people living in giant space stations. He said most inhabitants of these would visit Earth for vacations. He envisions our planet returning to its pristine environment, as factories would be built in space. Task 9

It was a typical sunny day, nothing suspicious. My family was going to a wonderful lovely journey. It was winter vacation, so there should be a lot of New Year's activity among streets. The time we arrived at the city was New Year's night, so we were in a really good mood. The city we were arriving was called a New Year's capital that ~~year~~ ^{time}, ~~however~~ ^{never} we had never been there, so we went for a walk few minutes after arrival. ~~Unlikely holiday~~ That, however, was a huge mistake.

Unlikely, almost everything was closed that time, because it was very early morning. We heard a lot about local cuisine and were intended to taste it, but ~~when~~ we discovered that restaurants were closed, ~~then~~ we immediately checked online maps and everything came clear. We hadn't bought a number in hotel because we had tickets on the train that day so it was meaningless to spend money for few hours only. Just after understanding that there were no place to hide from the cold in the whole city we started to think why did we leave an airport. In any case it was far away from the city, so we had no idea what to do. In a few moments a misadventure turned adventure for us. From

a touristic trip it changed to a survival in harsh winter conditions in the unknown city. Big snowflakes fell to our faces, cold wind was singing its mischief song. The success of a travel seemed over for us.

Suddenly, after hours we were wandering without any goal, we found a solution. The underground was finally opened. With a breathe of relief we entered it and sat down at the warmest place of the station. To be honest it wasn't that way how we expected to last that day!

As a result we waited until the restaurant we wanted to visit opened and passed time before our train there. Some of us fell asleep, but after we tried local dishes, everything was quite nice for us. Despite the situation was out of our plans it was very funny to remind the story and it seems that we will remember it for the long time!

She ~~was wandering~~ through bustling bazaars, her senses were alighted with array of spices and fresh seafood. ~~Her~~ ^{Her} search brought her to a hidden cove, ~~at~~ just as fishermen bring in their early catch.

There, Zoe discovered rare fish, its flavor wasn't like anything she had ever tasted. This discovery ignited burst of creativity: ocean's bounty was exhilarating, but there were unexpected findings that truly inspired her. Zoe's culinary adventures, blended traditional techniques with avant-garde tastes, soon became legendary, inspired others to explore and embrace the diversity of world's flavors.
