Task 7:

Firstly, big cities are crowded. You always see big queues into infrastructure objects. Secondly, the only

calm place will be home, but if you don't have noisy neighbours. Thirdly, when you are outside, you breathe dirty air because of traffic jams and a lack of trees. Therefore, there is a risk to be in danger during earthquakes. In case of disaster there will be lots of skyscrapers' debris which can kill a person.

Task 8:

The pie chart shows a big social networking activity among teenagers.

Seventy three percent of teens use social networks everyday. I think it's normal because gadgets have become a necessary part of our life.

More than one-fourth of teens chat everyday.

This statistic shows a big desire of teens to ~~chat everyday~~ communicate. In a pie chart there was a comparison of two famous apps Twitter and Facebook. We can see that less than one-tenth of teens use Twitter, while more than one-fifth of teens log on to Facebook over ten times per day. Also, it's common for ten-aged children to use Facebook because twenty five percent of teens do it. It was noticed that it's important for teens to have

many friends in Facebook. It increases their
social status. So, that's why the average
teen has ~~20~~ two hundred and one Facebook
friends.
