TASK 3

- 1) False (because human activities haven't begun influencing climate change only recently, they have been a major cause of it since the industrial age.)
- 2) False (because greenhouse gases trap heat from the sun and warm planet, it leads to rising sea levels. Therefore rising sea levels is the result of Earth cooling up, not down.)
- 3) False (as in this text solar power isn't one alternative to fossil fuels. There is another one mentioned in the text - wind power.)
- 4) False (because trees don't release carbon dioxide into the atmosphere when they are cut down. Besides, trees absorb it but are being cut down rapidly.)
- 5) True (because there is written down in the text

that individuals can play a role in reducing the effects of climate change by choosing public transport over a personal vehicle.)

6). Not given

7). False (because businesses are also responsible for setting and following guidelines to curb emissions. Therefore businesses actually need to follow guidelines regarding climate change)

8). True (because it's mentioned in the text that climate change has already impacted ecosystems and ~~communicates~~ communities worldwide, so it truly affects all ecosystems and societies around the world).

it's necessary for future generations.")

• When I firstly noticed the girl, I was shocked. I thought that it's really suspicious and asked

myself: "What is she doing here? Forest is not a place for children."

• I asked the name and the address of this girl, gave her hat back and helped her to reach home, Then I reminded her that ~~it's dangerous to walk in the forest alone~~ her actions are dangerous for a kid.

b). Before meeting the girl I was frightened because I thought that it's a bear which is going to eat me. While talking to her I couldn't even guess why was she walking there. Therefore I was suspicious. After this I felt delighted as I did the great deal.
