Task 4

2. No mistake has been made, Clara was really selected for this programme. She turned a blind eye on this invitation, but at the back of her mind the girl knew: confirming her interest gives her an opportunity to see the world. If only it wasn't Clara's biggest success, would she forget about this chance. Sooner or later she had to decide, so the girl started doing her research on this programme.

4. This assumption enraged Clara. She ~~had~~ had doubted herself, but now she was certain: she had to confirm.

On the verge of tears, caused by the assumptions of others, Clara filled in the form in one go and sent it out. The girl couldn't believe it, she ~~did~~ send that form! After that she hectically checked her e-mail every day, waiting for a reply.

6. No matter the outcome Clara thought, that the confirmation must have been the best decision of her life. She will have ~~known~~ the result in a week, it felt remaining to have known

a little break from making life-altering choices. Later Clara received a straightforward reply from the organisers of the programme, stating that she was in. She was not going to take it for granted, but rather enjoy her international study.

Task 5.

1. Level-headed - to be calm and not biased in one's decisions and actions
2. Vicious circle - a following of negative events, where the previous event causes the next one.
3. Bugbear - a reoccurring problem, that is hard to get rid of
4. A tall order - a task that is almost impossible to do
5. Heyday - the beginning of one's path in any field

Task 6.

1. I spoke to the person who was in charge
2. She started to hate working at weekends
3. His argument was so convincing, that they changed their minds
4. Guests are expected to arrive on time
5. The presentation was hardly finished when the applause began
6. You will fail, unless you prepare adequately
7. It surprised me how she was remained calm

Task 7.

1. Newton was the one to invent the laws of motion used in modern textbooks
2. Mary Curie is usually associated with laboratory experiments on radioactive elements
3. The first person who discovered penicillin was a Scottish scientist - Alexander Fleming
4. Even though Lovelace is the first computer programmer, she didn't build nor test a computer
5. Alexander Fleming didn't develop a vaccine for tuberculosis, but that doesn't make him less great.
