Paragraph 2

Taking Clara's family's business that she would sooner or later inherit into account, it seemed like she could turn a blind eye to the offer. But she didn't like feeling like her fate has been sealed, even though at the back of her mind Clara knew that if she hadn't been

born into this family she would have to work much harder.

Paragraph 4

Upon hearing that, Clara was so offended she was on the verge of tears. She had heard things like that before, but this time her thoughts grew hectic. She wanted to prove that she was more than her family's money, so she pulled out her phone and typed that she was interested in the programme. Only then did she realise that she had destroyed her reputation in one go.

Paragraph 6

However, this helped Clara understand who her

real friends were, since her classmates became straightforward in expressing their displeasure with her. She realised that she must have been taking their company for granted, without considering their actual feelings. At the same time, Clara knew one thing: the programme would be rewarding, and by the time she will have finished it she will forget all the problems with her school.

Task 5.

1. Keeping one's composure, making carefully thought through decisions, not being affected by stress.
2. A cycle where attempting to get rid of one

problem creates another one.

3. Something that bothers a person but is very important and needs to be taken care of.

4. Something that is nearly impossible to do and would require a lot of effort.

5. The time of one's greatest fame, importance and prosperity, the highest point of the existence of something.

Task 6.

1. I spoke to the person who was in charge.

2. She used to hate working at weekends.

3. His argument was so convincing that they changed their minds.

4. Guests were expected to arrive on time.

5. Hardly was the presentation finished when the applause began.

6. You will fail unless you prepare adequately.

7. What surprised me was how calm he remained.

Task 7.

1. Galileo couldn't conduct controlled experiments as you can't control celestial bodies, he made observations.

2. Hawking couldn't carry out experiments due to his physical limitations. He popularised physics.

3. Pasteur wasn't the one who discovered penicillin, it was Fleming.

4. Lovelace couldn't build an electronic computer because the technology wasn't that advanced back then.

5. Fleming discovered penicillin by accident, not while developing a vaccine for tuberculosis.
